

Assignment -2
Python-flask Programming

Assignment Date	19 September 2022
Student Name	Tamil Priya T S
Student Roll Number	19ITR111
Maximum Marks	2 Marks

Question-1:

1. Create a Flask App
2. Add the Home page, About Page
3. Add the Bootstrap
4. Add the Sign in page and App the Signup Page+ database connectivity

app.py:

```
from site import USER_BASE
from flask import Flask, render_template, url_for, request, redirect
import sqlite3 as sql

app=Flask(__name__)
app.secret_key = "secret_key"

@app.route('/')
def home():
    con = sql.connect('user_base.db')
    con.row_factory=sql.Row
    cur=con.cursor()
    cur.execute('select *from user')

    users= cur.fetchall()
    con.close()
    return render_template('index.html', users=users)

@app.route('/about')
def about():
    return render_template('about.html')

@app.route('/signin')
def signin():
    return render_template('signin.html')

@app.route('/signup')
def singup():
    return render_template('signup.html')

@app.route('/user/<id>')
def user_page(id):
```

```

withsql.connect('user_base.db') as con:
    con.row_factory=sql.Row
    cur =con.cursor()
    cur.execute(f"SELECT * FROM user WHERE email='{id}'")
    user = cur.fetchall()
    return render_template("user_info.html", user=user[0])

@app.route('/accessbackend', methods=['POST','GET'])
def accessbackend():
    if request.method == "POST":
        try:
            firstname=request.form['firstname']
            lastname=request.form['lastname']
            e_mail= request.form['email']
            phone=request.form['phone']
            password=request.form['password']
            dob=request.form['dob']

            withsql.connect('user_base.db') as con:
                cur =con.cursor()
                cur.execute('INSERT INTO user (firstname, lastname, email,
phone, password, dob ) VALUES(?,?,?,?,?)',
(str(firstname),str(lastname),str(e_mail),str(phone),str(password),str(dob)))
                con.commit()
                msg='u r resgistered!'

        except:
            con.rollback()
            msg='some error'

        finally:
            print(msg)
            return redirect(url_for('home'))
    else:
        try:
            tue=request.args.get('email')
            tup=request.args.get('password')
            print(tue,tup)
            withsql.connect('user_base.db') as con:
                con.row_factory=sql.Row
                cur=con.cursor()
                cur.execute(f"SELECT password FROM user WHERE email='{tue}'")
                user= cur.fetchall()

        except:
            print('error')
            con.rollback()

        finally:
            if len(user) >0:

```

```

        if tup == user[0][0]:
            return redirect(url_for("user_page", id=tue))
        print(user[0][0])
        return redirect(url_for('signin'))

```

About.html:

```

{% extends 'base.html' %}
{% block head %}

The screenshot shows a web browser window with the address bar displaying "127.0.0.1:5000/signup". The page has a navigation bar with links: "Navbar", "Home", "signin", "signup", "about", and a "Dropdown" menu. A search bar is located on the right side of the navigation bar. The main content area features a "SIGNUP" form with the following fields: "first name" (filled with "raj"), "last name" (filled with "sekar"), "email" (filled with "official@gmail.com"), "phone" (filled with "0987654321"), "password" (filled with "*****"), and "date of birth" (filled with "02/08/2002" and a calendar icon). A blue "submit" button is at the bottom of the form. The background of the page is a gradient of blue and purple. The Windows taskbar is visible at the bottom, showing the search bar and various application icons.
